

## **THE GROUPE IDEC IS BUILDING A NEW FACTORY FOR ELIS CLEANROOM IN SWEDEN**

The GROUPE IDEC has just been awarded a contract to build a highly technical project for ELIS CLEANROOM in Sweden. This project follows a previous joint project between the group and ELIS as a contamination control specialist. The signing of this contract confirms the GROUPE IDEC's desire to work with its clients in France and abroad.

### **Another project in Sweden**

ELIS CLEANROOM, a firm specialising in the hire and maintenance of contamination control solutions for clean rooms and controlled environments, has renewed its trust in the GROUPE IDEC awarding them the contract to design and build a turnkey project for its new facilities in Nyköping in Sweden, which will be used by BERENDSEN (a subsidiary of the ELIS Group). This latest project comes after the first successful joint project between the two companies involving the construction of a factory to treat clean and sterile laundry textiles near Paris.

### **Complete design and technical support and expertise**

The GROUPE IDEC offered ELIS CLEANROOM a full support throughout the project from the absolute start. The French team in charge of the previous project offered its know-how and its experience to design this new project with the group's international team. This team work allowed to the GROUPE IDEC to be awarded for the construction as a turnkey project.

## **A factory for clean rooms type ISO 5 et ISO 7 within a fully controlled environments**

This project is designed to replace their current facilities, which is no longer suitable for the requirements of ELIS CLEANROOM and its subsidiary, BERENDSEN. Based 100 kms or so south of Stockholm, this new factory will meet the firm's highest standards of hygiene and cleanliness that the most demanding clients expect today. This factory also aims to cope with an increase in the business of the firm specialising in the maintenance of ultra-clean clothing, while respecting the environment and energy efficiency targets that are expected from a 21st Century business.

### **Work to begin in January 2020**

On a 7000 m<sup>2</sup> land, the 2500 m<sup>2</sup> factory will include a large washing area ranked ISO 5 and ISO 7. This high level of hygiene will allow the firm to meet the standards required by ELIS CLEANROOM's clients in the life sciences and pharmaceutical sectors. Work is due to start on this new project early next year. The project is due to be handed over in the first quarter of 2021.

### **An international partner**

Like ELIS CLEANROOM, the GROUPE IDEC and its subsidiaries work with their clients to build their projects abroad working as a planner, developer, investor and designer-builder. In Europe, Asia and the United States, whatever the type of building, its teams work alongside them from the start of the project to ensure the successful construction of their future facilities.

## **ABOUT THE GROUPE IDEC**

Founded in 2000 by Patrice LAFARGUE, the GROUPE IDEC is one of the rare multi-skilled companies in the French property market and is involved in all sorts of work (planning, development, investment, design - construction) in every field of activity (residential, industrial, logistics and business premises, offices, commercial property, interior design...). The GROUPE IDEC is therefore able to offer a tailor-made all-round solution to its clients and partners: firms, local authorities and private individuals. With a solid base in France, the GROUPE IDEC has over the past three years stepped up its development abroad.

2000 Year when founded

400 members of staff in France, 1700 around the world

500,000 m2 of property built per year

388 million Euros of turnover in 2018
